### CHALLENGE

Ms Nasara Batool , Mouza Wan Patafi, Basti Gamhon and UC waan Patafi in district Muzafargarh, states,

Married 2 years ago and came to this village as first educated women. This was one of the verse affected villages of the district. Literacy rate in this village is bellow 20%. Although we have number of private schools but people are very poor and only some can send their children to school.

This place has too many issues including health, education, hygiene, water shortage and contamination. Open defecation is common that means lot of hygiene issues and diseases.

### INITIATIVE

Friends Foundation came with USAID funding to work on water, sanitation and hygiene promotion. They conducted 2 days trainings on hygiene and safe drinking water. I was also enrolled as one of the activist in 2 days training. After the training I came back to my school and taught every thing I learnt to my students and other teachers. We all started working on hygiene and safe drinking water. I conducted demonstrations for teachers and students. They all go and conduct the same for families in the village.

### RESULTS

I am running a hygiene and safe drinking water campaign together with my colleagues and students. We will inshallah bring it as a model village in the district.
